Residence: Amsterdam, Nederland

Languages: Italian (native speaker), English (good level), Dutch (school level), French (school level)

Bachelor's degree: Computer Science and Information Technology, Alma Mater Studiorum, Bologna, Italy

I'm a web developer with growing experience and a big passion for web technologies since around 2005. During my work experience I've always done my best and I consider myself a very dedicated worker, precise to achieve the goals I'm assigned to. I feel confident in finding the best solutions appropriate for different scenarios and in solving problems. I like to participate in brainstorming stages of projects. I am able to manage the application development in medium/big projects, to provide "one-face" to customers and to reach goals by making decisions under pressure. I am keen on knowing and learning modern technologies, work strategies and methods. My ambition is to be able to work in a challenging and dynamic environment, where I can develop and improve myself, not only as a webdeveloper but also as a person, give and receive experience with everybody and keep updated my professional skills.

Skills

- Languages, markup, frameworks and package managers (known with different skill level):
 - Excellent:
